Section 10

Township 50N

Range 15W

Information Complete On 16-MAR-2005

Posting Expires On 15-APR-2005

Authorization Type MN LOP-B

PROJECT DESCRIPTION AND PURPOSE: The applicant has submitted a permit application to discharge fill material into 0.97 acre of wetlands adjacent to Rocky Run Creek for the construction of an AAD Shrine Center in Hermantown, Minnesota. The project would also include the construction of a driveway, parking lot, landscape areas, and two storm water detention basins. A wetland delineation has been prepared for the property, however, it has not received Corps concurrence. It is anticipated that the delineation will be reviewed by the Corps in May 2005.

NAME, AREA, AND TYPES OF WATERS (INCLUDING WETLANDS)

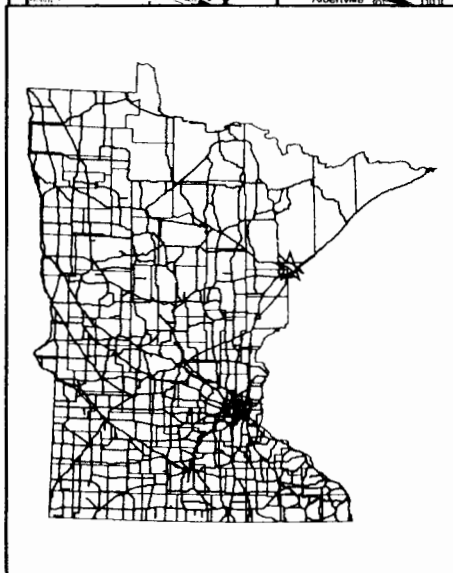

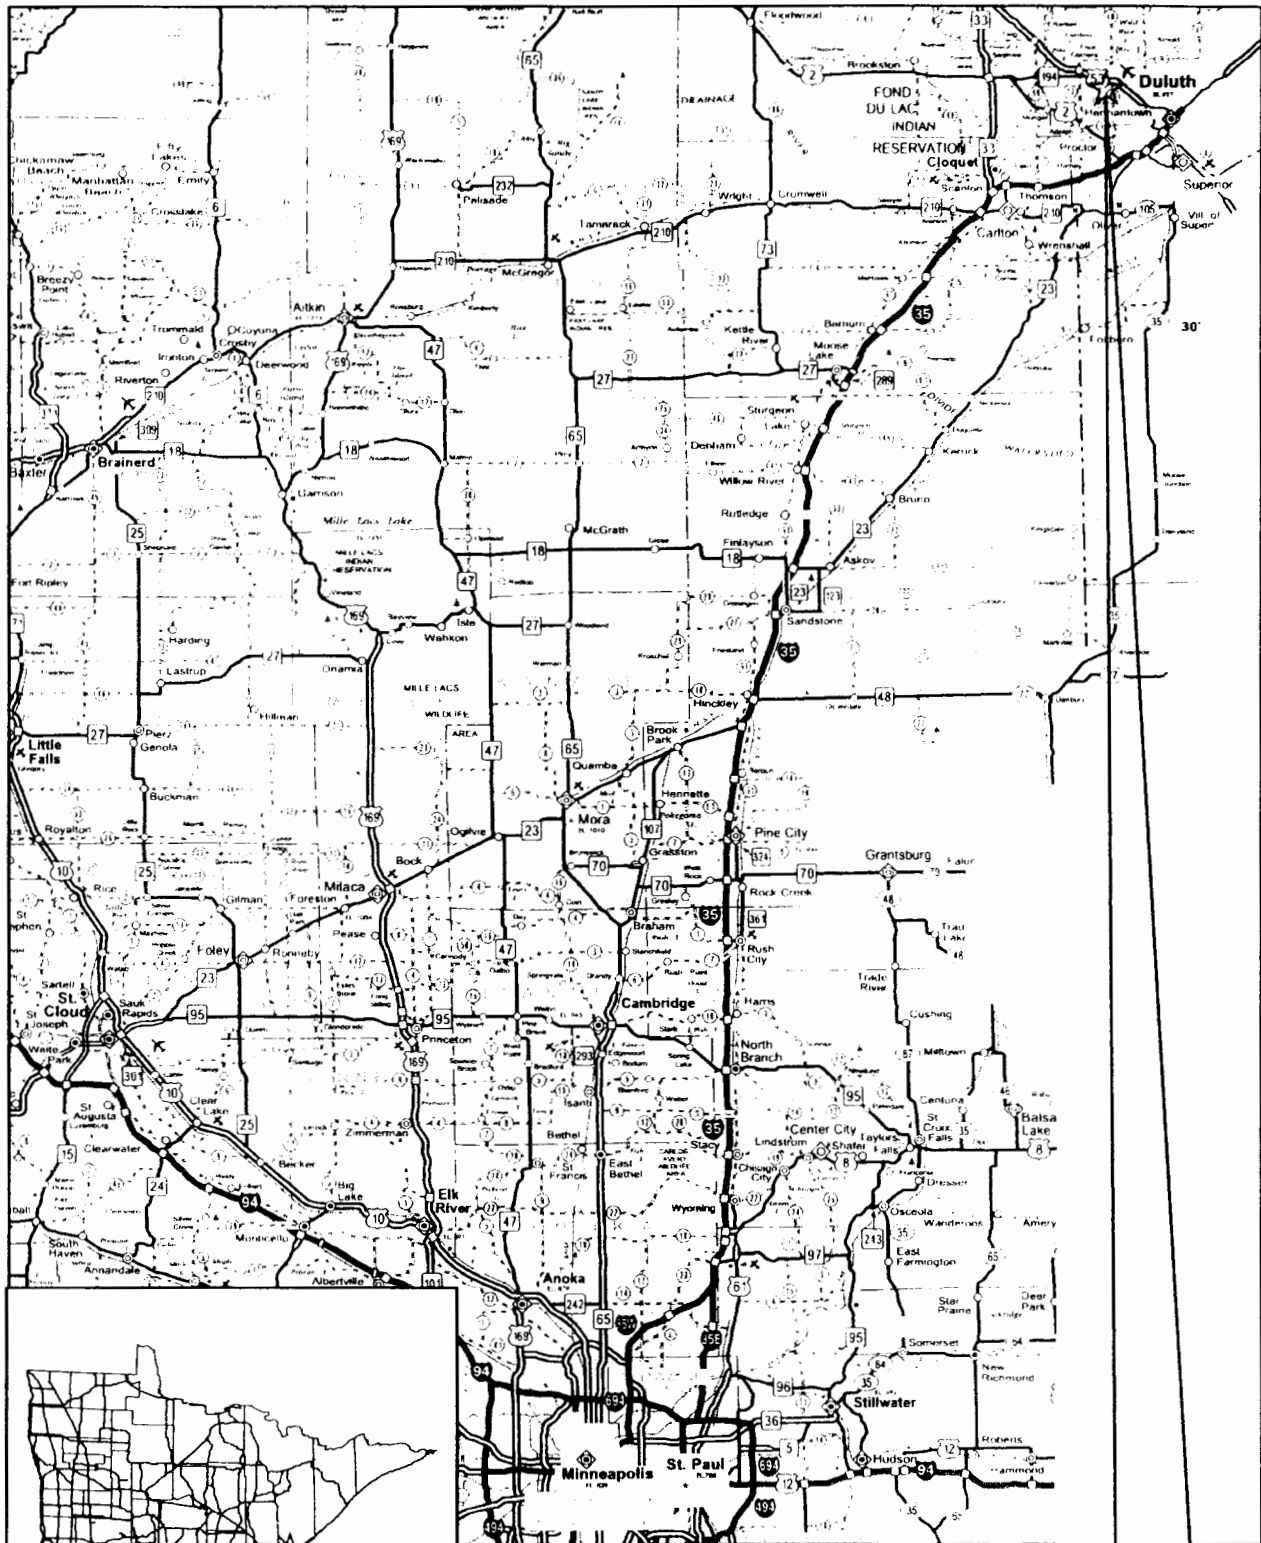

SUBJECT TO LOSS: As currently proposed, the project would result in the permanent loss of 42,450 square feet (0.97 acre) of Forested (Type 7) wetlands. The wetlands are part of a large wetland complex that constitute the headwaters of Rocky Run Creek.

ALTERNATIVES: According to the applicant, many alternative properties were reviewed for the project. However, the selected parcel located along Highway 53 fit their needs. The applicant also states that a number of project layouts were considered, but the current layout works best.

MITIGATION: The applicant proposes to compensate the permanent loss of 0.97 acre of Forested wetlands within the St. Louis River watershed by purchasing 0.97 acre of shallow marsh (Type 3) wetland credit and 0.49 acre of upland buffer credit from a wetland bank located in Becker County, Minnesota.
